REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: neither Lynam et al, Nyhan et al, nor any of the rest of the prior art teach applicant's step of "persisting", or storing, variable data in a LIDB, with the variable data collected from a data network. Newton's Telecom Dictionary describes a "cookie" as information placed on a client's PC for later use. "This information is persistent, meaning that it remains in memory for subsequent use by the specified URL." Therefore, applicant is writing/storing Internet data information on a Line Information Database, which is not taught by the prior art. No obvious combination of references found would have taught one of ordinary skill in the art to make and use applicant's apparatus as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Creighton H. Smith whose telephone number is 571/272-7546. The examiner can normally be reached on M-F, alternate Fridays off.
